

# Andrew and Jenny's journey with SV Solar

Every successful  
journey starts with an  
experienced guide,  
let's begin!

## Meet Andrew and Jenny

Andrew and Jenny have 2 kids who go to school while Jenny works from home, and Andrew goes to work early in the morning and comes back in the afternoon. Their electricity bill increases every quarter and there's always something or the other every weekend where they either stay at home or go out somewhere as a family.

Andrew was frustrated with electricity costs and the costs of living constantly rising. So he reached out to many solar companies, luckily we were in contact too!

We sat together with Andrew and Jenny and looked at all the competitors quotes. Everyone promised "the best" system for them, but non knew the "right one" for their home which meant a cheap job for now but a big headache for later

We took our 'salesman hat' off and looked at the roof, wiring, metering, and energy consumption of their family. We discussed their concerns and financial goals as well and focused on finding the "right" system for them that would give them peace of mind

They had just got the house and didn't want to pay full cash upfront, so we figured out a 0% interest loan within 24-hours for them with low fortnightly payments which made life much easier for them

We installed the system within a week, and they got it metered after a few days. They went through the process and trusted our experience

After their quarterly bill came, they were satisfied with the leap they took us to guide them to lower electricity bills and see the bright side above all the fuss in between!

Let's see the start and end of their journey
